Reviews

This publication is definitely worth buying. It is written in straightforward words rather than difficult to understand. You are going to like how the writer composed this publication.

(Dr. Joaquin Klein)

SYSTEM THEORY

Book Condition: New. Publisher/Verlag: Springer, Berlin | Modeling, Analysis and Control | System Theory: Modeling, Analysis and Control contains thirty-three scientific papers covering a wide range of topics in systems and control. These papers have been contributed to a symposium organized to celebrate Sanjoy K. Mitter's 65th birthday. The following research topics are addressed: distributed parameter systems, stochastic control, filtering and estimation, optimization and optimal control, image processing and vision, hierarchical systems and hybrid control, nonlinear systems, and linear systems. Also included are three survey papers on optimization, nonlinear filtering, and nonlinear systems. Recent advances are reported on the behavioral approach to systems, the relationship between differential games and robust control, estimation of diffusion processes, Markov processes, optimal control, hybrid control, stochastic control, spectral estimation, nonconvex quadratic programming, robust control, control algorithms and quantized linear systems. Innovative explorations are carried out on quantum systems from a control theory perspective, option valuation and hedging, three-dimensional medical visualization, computational structure biology image processing, and hierarchical approaches to complex systems, flow control, scheduling and force feedback in fluid mechanics. The contents reflect on past research accomplishments, current research activity, and future research directions in systems and control theory. | Preface. List of Figures. 1. Sanjoy K. Mitter: A Scholar, a Gentleman and a Friend; I.C. Schick. 2. Fictitious Domains and Approximate Controllability; J.-L. Lions. 3. Dissipative Distributed Systems; J.W. Willems. 4. Systems Theory over Finitely Generated Abelian Groups; F. Fagnani, S. Zampieri. 5. Regularity of Solutions to Hamilton-Jacobi Equations; A.C.G. Mennucci. 6. On the Stochastic Control of Quantum Ensembles; R. Brockett, N. Khaneja. 7. Some Applications of Fractional Brownian Motion to Linear Systems; T.E. Duncan. 8. Uniform Stability of Controlled Markov Processes; V.S. Borkar. 9. Deterministic and Stochastic Approaches to Nonlinear Filtering; W.H. Fleming. 10. Risk-Averse Designs: From Exponential Cost to Stochastic Games;...
