

50 Science Numbers Everyone Should Know

By Richard J Fruncillo MD PhD

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 64 pages. Dimensions: 8.0in. x 5.2in. x 0.1in. Over the last one hundred years, scientists have revealed answers about the sun, earth, universe, and life itself that have eluded mankind for most of its existence. Despite these rapid and enormous advances in human knowledge, most people remain woefully ignorant about the major scientific mysteries that have been solved in our lifetimes. From revealing the speed of light to discovering when the dinosaurs went extinct to knowing when organs first begin to form in a human embryo, this book brings the reader up to date on key concepts of scientific literacy. Told in short answers that use the power of numbers to explain science, this book will appeal to children, teenagers, and adults alike. It can be useful teaching tool for classroom instructors and a quick primer in science for adults. It can be read in a single session while flying on a plane or traveling as a passenger in a car. The authors succinct and well-phrased explanations will help readers talk with authority about science matters. Wondering how old the Earth is Dr. Fruncillo's answers helpfully...

Reviews

This is actually the very best publication i have read through till now. It is definitely simplistic but unexpected situations in the 50 % in the pdf. You can expect to like just how the article writer compose this pdf.

-- **Ms. Elinore Wintheiser**

Certainly, this is actually the best job by any article writer. It can be loaded with knowledge and wisdom I realized this pdf from my i and dad advised this book to discover.
