

The new global IT value chain - what comes after offshoring

By Jan Heipcke

GRIN Verlag Mrz 2013, 2013. Taschenbuch. Book Condition: Neu. 297x210x3 mm. This item is printed on demand - Print on Demand Neuware - Seminar paper from the year 2005 in the subject Computer Science - Commercial Information Technology, grade: 1,0, European Business School - International University Schloß Reichartshausen Oestrich-Winkel (Information Systems II), 39 entries in the bibliography, language: English, abstract: The world is changing, more than ever before it is not granted, that a once learned job will earn one money in the future, or if it will still exist at all. Employees are frightened that their job will end up in the vortex of global sourcing, as jobs are more and more displaced to low-cost countries as companies strive to save their costs. This development is part of the globalization, as international trade borders fall and markets open for global competition. It is taking place in a rapid pace and first comprised mostly production jobs, as companies in those low-cost countries where able to produce at much lower costs, as are companies in western economies with high social standards and therefore costs. While at first, it where only easy manufacturing jobs, nowadays even complex products as Notebooks are only...
