Taylor Francis Ltd, United Kingdom, 2015. Paperback. Book Condition: New. 2nd Revised edition. 234 x 156 mm. Language: English . Brand New Book. The current focus on sustainable development opens up debates surrounding our relationship with the natural world, about what constitutes social progress and about the character of development, both in the Global North and the Global South. The promotion of sustainable futures is taking on a new urgency in the context of climate change and biodiversity loss. This concise and accessible text explores how the international community is responding to the challenge of sustainable development. It also investigates the prospect for, and barriers to, the promotion of sustainable development in high-consumption societies of the industrialised world, from the USA and the EU to the economies of transition in Eastern and Southern Asia. In Sustainable Development Baker considers the global impact of China's industrial boom as well as how Chinese investments are shaping the prospects for sustainable development on the African continent. This global coverage is balanced by investigating how local action, ranging from the transition towns movement in the UK to the Green Belt movement in Kenya, can contribute to the pursuit of sustainable development. The second edition has been extensively revised and updated and benefits from the addition of three new chapters: sustainable development in China; the governance of sustainable development; and sustainable production and consumption. Climate change and biodiversity management have also been expanded into full chapters. Providing an up-to-date and comprehensive treatment of the issues surrounding the promotion of sustainable development, this unique, internationally-focused book combines a strong conceptual analysis with wide ranging empirical focus and a wealth of case material. Including summary points and suggestions for further reading, as well as web resources and an extensive bibliography, it is ideal for students, scholars...
