Reprinted from Surgery, Gynecology and Obstetrics, May, 1906, Volume II, No. 5. THE POSITIVE-PRESSURE METHOD OF ARTIFICIAL RESPIRATION With A Practical Device For Its Application In Thoracic Surgery, Together With A Report Of Transpleural Operations On Fourteen Dogs By NATHAN W. GREEN, M. D. ARTIFICIAL respiration may be of use in the fields of emergency-work, of medicine, and of operative surgery; in resuscitating the asphyxiated and drowned; in maintaining respiration while poisons are being eliminated from the system, as in opium-poisoning (1, 2), or ether in overdose; and in preventing the alarming symptoms incident to collapse of the lung during operative work (3). Different methods of procedure in the surgery of the thoracic cavity have been attempted with the hope of warding off the undesirable phenomena...
